Account No.: _____________________________

***Note: Many aspects of this site use “pop-up” windows. Pop-up blockers must be disabled for this site to work properly.

How To Create an Order on the Web:

1. Click on ‘Ordering’ tab and then the ‘Orders’ sub-tab (Top left of website page)
2. Click on ‘New Order’ Button (Image 1)
3. When pop-up window appears, choose Dept., PO# (Defaults to Date), leave Order Status on 'Open' and select Warehouse.

4. Click ‘Add New Order’ Button (Image 2)

Once ‘Add New Order’ is clicked, header appears with current order highlighted in orange. Dept., Order Status, PO# and Warehouse may be edited by clicking on pencil icon, whole order may be deleted by clicking on trash can icon (Image 3).
***Note: There may be multiple open orders at one time, for demonstration purposes only one order is visible in the tutorial. If there are multiple orders open be sure you click on the correct order header and that it is highlighted in orange. If the user forgets to do this there is the possibility of adding items to someone else’s order.

**Basic Item Entry Methods:**

1. **Last 5 digits of NDC.**
2. **Entire NDC#** with or without dashes in 5-4-2 format (11 digits).
3. **M&D Item No.**
4. **User Item No.** (Must have Hospital #’s linked to M&D #’s).
5. **Package Scan** (Must have scanner attached to PC). Simply put cursor in Item Search window and scan NDC# on package.
6. **Partial Description (One Word).** This will retrieve all brand and Generic Descriptions containing the selected characters. ***Note: Expand the description to limit results.
7. **Partial Description (3 Word Maximum).** Insert space between each partial word. Example: “furo tab 100”, this is an efficient search method for combination drugs or specific product forms and sizes.

Any of the above entry methods will take you to a second screen to choose proper item and enter quantity. Images 4 thru 6 demonstrate the steps necessary to add items using the above methods.

For demonstration purposes, using Partial Description (3 Word Maximum) method to find item... click ‘Item Search’ button or <enter> to advance to next screen
Once quantity is entered for all item(s) you want to add to order (Image 5), click ‘Add Item’ and you will be sent back to the Order Screen (Image 6) with item(s) added to list. If preferred, ‘Add and Search Next Item’ button will add item to order and send you to page with Item Search bar in order to quickly search for next item.

Image 5—entered quantity of ‘1’ for top item
Quick Item Entry Methods:

8. **Single item entry when quantity and item# is known.** Enter the following into Item Search Window on order screen: Quantity, *, Item# or NDC# (Example: ‘5*795302’) This prevents having to go to another window to enter quantity.  

***Note: Default your user preferences to sort by ‘Reverse Sequence’ so that the newest item entered is always at top of list.

Images 7 and 8 show this method being used below:
9. **Multiple item entry when quantities and item#’s are known.** Click on ‘MSI Download’ button located underneath order headers. Pop-up window will appear. Enter the following into the text box: Quantity, *, Item# or NDC# (Example: ‘5*795302’) <enter>, repeat. Once all items are in text box, click on ‘Process’ button. A new screen will appear which allows user to change quantity or link any item not recognized by system to proper number (simply click on current item # which will be highlighted in red. Once all quantities and items are good to go, simply click ‘Add Items’ button.

Images 9 thru 14 show this method being used below:
Image 11—Once item# is clicked on, search screen comes up to find proper item.

Image 12—Choose new item by clicking on pencil icon next to proper item.
Image 13—Notice the item 2nd from bottom is now filled in with proper item (compare with Image 10)

Image 14—Once ‘Add Items’ button is clicked, all items are added to order

*** Note: Any items not linked on process screen (Image 13) will not come into order.
10. **Using a Quick Order Form.** This requires setting up a Drug Group (A) and then linking the Drug Group to a department (B). Any item in the Drug Group will be on the Quick Order form. This method is often used when ordering same items for other departments over and over, for hard to find items and for high-volume items. The ‘Quick Order’ button is located next to the ‘MSI Download’ button in the Order header section. Once a Drug Group has been linked to a specific department, the button becomes ‘active’ for that department. Below are instructions and screenshots on set-up.

A. **Setting up a Drug Group.** Click on the ‘Reports’ tab and then the ‘Drug Groups’ sub-tab. Once there, click on ‘Add New Group’ button (Image 15).

![Image 15](image15.png)

Once the add screen appears (Image 16), simply type in the name of your Drug Group (I usually name it the same as the dept. I’m attaching it to) and choose compute by cost on the drop down menu. In this example, I’m creating a Drug Group called ‘Dietary’ that I will attach to my Dietary Dept. There is no need to change dates or enter a % goal for this purpose. Click on ‘Add Drug Group’ button.

![Image 16](image16.png)
Choose the Drug Group you just added by clicking on the Description of it (in this case, ‘Dietary’) and you will see a few ways to add items to the Drug Group appear at the bottom of the screen (Image 17). The two main ways to add items are to use ‘Item Search’ or ‘Bulk Search’. Item Search can be used to search by M&D Item No., NDC No. or Description. Bulk Search can be used to search by M&D Item No. or NDC No. In order to use Bulk Search, simply put cursor inside the Bulk Search text box and enter in M&D No. or NDC No. then press <enter> and enter another number. Once all numbers are in, click on ‘Bulk Search’ button.

Once ‘Bulk Search’ button is clicked, A list of your items will appear as below (Image 18). Check the box next to the items you would like to add to the Group and click ‘Add Items’ button. Notice that the Dietary Dept. is defaulted.

Image 19 shows the two items added to the Group. From this point, you can add more items or delete any item you’ve already added by clicking on the trash can icon next to that item. Once linked to the ‘Dietary’ Dept., any item in this Drug Group will display on the ‘Quick Order’ form.
B. **Linking Drug Group to A Department.** Click on ‘Ordering’ tab then ‘Depts.’ sub-tab. Click on ‘Add A Department.’ button (Image 20). Enter in value for 5 fields... ‘Dept. Code’ & ‘Description’ can be same value (in this case ‘Dietary’), ‘Type’ should be Common, Under ‘Formulary From’ choose ‘Dietary’ (our Drug Group just created) and enter ‘MDWEB’ in all caps under ‘Send to EDI Acct No.’
When finished, click ‘Add Department’. Return to the orders screen by choosing ‘Ordering’ tab and ‘Orders’ sub-tab. Click ‘New Order’ button and choose ‘Dietary’ as your department. Once header is created, you will see ‘Quick Order’ button become ‘Active’. Click on ‘Quick Order’ button to see items that were just added in Drug Group (Image 21). Each item has an empty box to the left for quantities to be filled in. Enter in all the quantities you want for each item and then click ‘Add Items’ button. Now that this link is set-up, you can add or delete items from the Dietary Drug Group and it will automatically change your Quick Order list.

   Image 22—Site Legend located under ‘Help’ then ‘Site Legend’ link.

The dollar sign tells the buyer that a lower-cost alternative is available. If an icon appears that lets you know this item is out of stock, discontinued or there is a lower-cost alternative, you can simply click on the icon or the item description to pull up a list of alternates. Once this list is pulled up, you can switch to the proper item and update order (Image 23). ‘Help’ can be clicked on at anytime for legends and technical assistance phone number.
Image 23—Select alternative then click on ‘Update Order’ button.

2. Header Descriptions (Under Order Detail):

   Status: Will show any icons related to this item (see previous page for icon descriptions)

   Qty: Quantity being ordered

   M&D No.: Morris & Dickson Item Number

   Item Description: Description of Item

   NDC No.: 11 Digit NDC Number of Item

   Sch: Class Schedule of Drug

   Mfg: Manufacturer (See Help for listing of Abbreviations)

   Pkg Cost: Customers Package Cost, including contract price if there is a contract.

   AWP: AWP of item

   T: Type of Contract (G=Group, M=M&D Contract)... check Help for listing of Contracts

   Ext Cost: Quantity ordered times (x) Package Cost

   SHV: Inventory in Shreveport Warehouse

   Package Size: Package size of item

   Unit Cost: Package Cost divided by Package Size

   Last Purchase: Last Purchase Date of item

   GS: Generic Source Item (Retail Accounts Only)
**Sending the Order and Checking Acknowledgement:**

1. **Sending the Order (Image 24).** To send one order, simply click on ‘Send’ button next to the order header you would like to send. To send all orders, click on ‘Close All Open Orders’ button and all orders will be sent at once. At any time you can hold an order by changing its status to ‘Held’. This will prevent someone from sending order accidentally. To do this, click on the pencil icon next to the order header.

   ![Image 24](image24.png)

2. **Checking Order Acknowledgement.** Wait 2 to 3 minutes then click on ‘Order Acks’ sub-tab (under Ordering Tab) to check for acknowledgement. Once there, you can click on ‘Print Today’s’ button to see everything ordered and being shipped for today. At this point, you can add any shorts to a backorder queue by clicking on ‘Acct Name’ next to order description and then ‘Copy Selected Shorts to Backorder Queue’ Button. Any items in backorder queue will have an order automatically created for you to send when stock is received on that item. This queue can be checked at anytime by clicking on the ‘Backorder’ button from the main order screen.

   *** NOTE: Please make it a habit to check Order Acknowledgements daily... this is the one way to verify that your order was sent successfully.
How To Create a Return on the Web:

1. Click on ‘Ordering’ tab and then the ‘Orders’ sub-tab (Top left of website page)
2. Click on ‘Returns’ Button (Image 25)

3. Enter in one-word text search, M&D No. or NDC No. to find item you are returning (Image26) then click ‘Item Search’.
A list will appear with each date that item was purchased. Please be sure and select the correct date for the item you are returning. Prices change and if an older date is selected, you will not receive the full credit entitled to you. Select the correct item/date by clicking on the Item Description (Image 27).

Once selected, a screen will appear which allows you to enter quantity (maximum of what you actually bought that date) and select a reason for return (drop-down menu). See Image 28.

Click ‘Add Item to Return’ button.
From this screen (Image 29), you can edit the item you just added by clicking on M&D No. of item, add another item using item search or close the Return by entering PO# and clicking ‘Close Return’ button. A PO# must be entered in to close a Return.

![Returns](image)

Once closed, a screen appears like below (Image 30). Click on Date & Time field to print the Return (Image 31).

![Previous Returns](image)

Morris & Dickson suggests that you print 3 copies of the Return. 1 to keep, 1 to put on outside of box and 1 to put inside of box. The one on the inside of the box is your protection in case something happens to the outside copy. Sign both your copies and have the driver do the same for your records. You can review previous returns anytime clicking on the ‘Returns’ button from the orders page and then ‘View Previous Returns’ button. There is a list of high-counterfeit items that Morris & Dickson has labeled ‘non-returnable’. Please refer to this list on Page 20.

PDMA AFFIDAVIT: Each Sack/box must contain a signed PDMA affidavit. The undersigned hereby warrants that the prescription drugs listed above have been kept under the proper conditions for storage, handling and shipping so as not to affect their quality according to the PRESCRIPTION DRUG MARKETING ACT OF 1987. The undersigned further guarantees that the credit requested is for the actual purchase price of the product (the invoice price minus any rebates, volume discounts, free goods and other price incentives) and that these products were purchased by this pharmacy from Morris and Dickson Co., LLC. in Shreveport, LA.

Signed: ___________________________ Date: ___/___/___

M&D Driver: ________________________ Date: ___/___/___

*** NOTE: Please refer to list of high-counterfeit items on Page 20. These are non-returnable.
**High Risk Items For Counterfeiting:** M&D will exercise extreme caution in accepting returns for any of the following items:

- Combivir
- Crixivan
- Crofab
- Diflucan
- Epivir
- Lamisil
- Lipitor
- Lupron
- Neupogen
- Nutropin
- Panglobulin
- Retrovir
- Risperdal
- Rocephin
- Serostim
- Sustiva
- Synagis
- Trizivir
- Videx
- Viracept
- Viramune
- Zerit
- Ziagen
- Zocor
- Ziagen
- Zocor
- Zofran
- Zoladex
- Zyprexa

**Extreme Risk Items For Counterfeiting:** Non-Returnable to M&D per Manufacturer or M&D policy. M&D can not accept returns on the following products. The only exception would be order entry errors on *Epogen or *Procrit, requiring a return authorization from your M&D salesman and the product returned within 7 days of the order entry error.

- *Epogen
- Gamimune
- Gammagard
- Immune Globulin
- *Procrit
- Venoglobulin
- Xigris
- Cialis
- Viagra
- Levitra

**Non-Returnable for Special Reasons:** M&D can not accept returns on Tamiflu or Relenza due to market conditions caused by the N1H1 outbreak. Our access to additional quantities of Tamiflu and Relenza requires that the product be allocated and non-returnable.

- Tamiflu
- Relenza
